Ciudad Soil & Water Conservation District Watershed Erosion and GSI Cost Share Program

Are you interested in water conservation?

Bernalillo County has a Water Conservation Incentive Program and offers free water efficiency consultations!

Learn how to estimate water savings from passive rainwater features, laundry to landscape conversions, and more!

WATER CONSERVATION INCENTIVE PROGRAM

Smart Water Monitors

Track your water use and detect leaks with a discounted smart water monitor

Replace your high-water-use toilets with free high-efficiency toilets

High-Efficiency Toilets

Tree Irrigation Kits

Receive a free drip irrigation kit that waters your trees deeply and efficiently

Ensure your landscape gets exactly the water it needs with a discounted smart controller

Smart Irrigation Controllers

Rainwater Harvesting

Harvest rainwater with free or discounted rain barrels (55, 200, or 360 gallon)

Reuse graywater to water your landscape with a free laundry-to-landscape graywater kit

Laundry-to-Landscape Graywater

The Bernalillo County Water Conservation Program serves Bernalillo County residents who are not connected to the Water Authority water system.

Ciudad Watershed Cost Share Program:

Ciudad SWCDS's Watershed Erosion and GSI Cost Share Program offers financial assistance to residents within our district to address erosion and stormwater issues on their properties and implement nature based solutions such as the use of green stormwater infrastructure (GSI).

Our program covers 80% of the project cost up to \$5,000 (for example, if your project costs, \$6,250, Ciudad SWCD will cover \$5,000).

Who can apply?

To participate in our program your property should be located within Ciudad SWCD.

Individuals, schools, non-profits, and neighborhood associations are all eligible.

Applicable Projects

Erosion control projects including installation of erosion control features such as berms, swales, check dams as well as stormwater culvert repairs or bridge repairs.

GSI projects including installation of rainwater harvesting basins, swales, or rain gardens with climate ready species or curb cuts.

For more information or a paper application, please email annie@ciudadswcd.org

Does your project involved converting lawn to xeriscape, rain water harvesting, or planting trees?

Water Authority customers may be eligible for Outdoor Rebates.

Learn more:

Report water waste:

New Mexico Backyard Refuge Program

Water Authority customers who participate in the xeriscape rebate and whose yards are certified as a backyard refuge are eligible for a rebate on their water bill.

The missions of the Backyard Refuge Program and the Water Authority's Lawn-to-Desert-Friendly Xeriscape Conversion Rebate Program align closely in their shared commitment to water conservation, sustainable landscaping, and supporting wildlife within our service area.

Both programs encourage residents to replace traditional high-water-use turf grass with native, drought-tolerant plants that conserve water and provide habitat for local species.
